

General Capacity – Pipeworks

CASA’s multi-disciplinary engineering construction service is experienced in the supply, fabrication and installation of process plant piping including piping, carbon and stainless steel for water supply, slurry lines and tailings disposal. Utilising our own plant and our in house drafting and fabrication workshops located in Brisbane and Townsville, CASA has the ability to mobilise quickly to site to execute services in a wide geographical region, including remote sites.

Our resources are skilled in a diverse range of projects supporting Clients within commercial, civil, mining, petro-chemical and water infrastructure industries.
